

Designer's Choice D type Coverplate EJs

DzD: Revolutionary design combines slim visual width, low profile, and hidden fixings. This floor coverplate system is designed for use in polished concrete, roll-coat epoxy, tiles, vinyl and other floor finishes. Low profile and slender width allows for minimal substrate rebating. Leaves no visual grout line when applied to polish or trowel-finished concrete. Suitable for high-end retail/commercial fit-outs with rebating constraints. Stadiums, transit-centres and other buildings with suspended-slab or slab-on-ground concrete.
